

TREASURY

Comments = for Keith's background.

Collection + Production = suggested language.

KIQ 53

1. Comment: Treasury, of course, is vitally interested in international monetary affairs. It also has a major interest in trade relationships, energy and raw materials problems, North-South economic issues, and in general, economic policies, plans, actions and trends in the EC and its member countries. It hopes it will be invited to participate in, or coordinate any finished intelligence papers produced on these subjects.

2. Collection: The Financial Attaches and representatives of the Treasury Department will collect and report on all of the economic objectives listed under this KIQ. The division of collection and reporting responsibility between Foreign Service and Treasury personnel will be determined by the embassy.

3. Production. Treasury ^{is principal} ~~will be producing~~ ^{periodically} ~~analyses~~ ^{production} in its Treasury Highlights and Special Report series ~~on the economies of individual European countries.~~

related to this question will appear in its periodic Special Reports series and its weekly Highlights.
